LEVER PLATE SHEARS

SAFETY NOTICE

1. Read this manual before use.
2. Keep children and pets away from this product at all times.
3. Secure this product to a workbench before use.
4. When not in use, remove handle and fit a locking bolt through the steel bar cutter to prevent the shear from being operated.
5. Keep fingers and hands away from the blades and steel rod cutter when using.
6. Wear eye protection when using shear.
7. Wear protective clothing and gloves when using.
8. Do not operate whilst under the influence of alcohol or drugs.

USES AND FUNCTIONS

Metal shears are used for cutting and processing various mild steel materials such as steel sheet, flat steel and steel rod. They are easy to use, reliable in quality, labour-saving, small in size, lightweight and easy to carry. As no electrical power is needed, they are ideal tools that can be installed and used.

MAINTENANCE

Before using, make sure that the shears are bolted on a workbench.

- The operator should stand and have both feet firmly on the ground.
- The lever should be used swiftly and smoothly.
- Make sure that the edge of the blade is kept sharp.
- Blades that become blunt should be properly sharpened or replaced.
- Be sure to periodically grease the moving parts and the moving blade when it is not used for long periods.

WARNINGS!

Do not position steel rod directly on the cutting edges of the fixed and moving blades. A sleeve blade hole in the moving blade is provided for shearing steel rod (see illustration).

Never force the tool to do the work of a larger industrial tool, failure to do so may cause damage to the blade of your tool, or cause personal injury.

NOTES

SPECIFICATIONS

Models and Processing Capacities (MM)		12300005
Max. Processing Capacities	Steel Sheet	5
	Flat Steel	70x5
	Steel Rod	0 12
External Sizes (LxWxH) (mm)		450x395x130
Net Weight (kg)		16
