# Updating the Diagnostic Scanner Tool

# Please note:

Internet access required to update the tool.

The up-date files are not stored on the disc, these will need to be downloaded from the website given below.

Installing the update program:
Insert the CD into your computers drive.
If you do not have a CD this follow this link and download the
software.
http://www.auteltech.com/up409.htm
Click on Maxi-Link, download and run the file.
This version will also run on windows 7.

If auto play is activated, click on Run setup.exe.

AutoPlay	
	) Mavil ink
V1.00	
Always do this for software	and games:
Install or run program from	your media
Run setup.exe Publisher not specified	
General options	
Open folder to view files using Windows Explorer	
View more AutoBlay options in	n Control Panel

🔜 install

If auto play is not activated, look for your CD/DVD drive and click on install.

The InstallShield Wizard will run. Keep clicking on Next> until you get to install. Click install.

When completed click on All Programs on your PC and find the MaxiLink folder. Click on MaxiLink to start the program.

If you see the red bar, please connect the diagnostic unit to the computer via the USB lead provided. The bar will go green and indicate that the unit is connected.

You now have 3 options.

- HP145 This will allow you to update you device.
- DTC Lookup This will allow you to look up any Diagnostic Trouble Codes
- Manual This is the devices manual in PDF version.

Update Program				
Step 1: Connect the device to computer with the USB cable supplied.				
Step 2: Click <select file=""> to locate update file.</select>				
Step 3: Click <update> to</update>	start updating.			
		Select File		
	Update			

# Updating the Diagnostic Trouble Codes

- Click on DTC Update and save the file where you will be able to find it.
- The file will end with .AUT
- Click on Select File and locate the .AUT file
- Click on the file and select open.
- Hold I left arrow button down until the device displays "Linking to PC... -Please Wait-"
- Click on Update

You may find that once you have updated the Program Software that your device now displays "AUTEL" at start up. This is normal and will not affect the function of the tool.
